

I.T.E.T. "G.CARUSO"
PROGRAMMA SVOLTO
LINGUA INGLESE
CLASSE IV B EE
a.s. 2020/2021

Libro di testo: K. O' Malley

Docente: E. Palmeri

ATOMS AND ELECTRICITY

- Atoms and electrons
- Conductors and insulators
- The battery

Listening and writing: Scientists who made the history of electricity

CIRCUITS

- A simple circuit
- Types of circuit: parallel and series circuits
- Current, voltage and resistance

-Reading: working with electricity (safety rules)

-Writing: describing a circuit , steps and safety rules

GENERATING ELECTRICITY

- Methods for producing electricity
- The fossil fuel power station
- The hydroelectric power plant
- Wind power

-Writing and speaking: describing a process (electricity generation) by using a diagram

DISTRIBUTING ELECTRICITY

- The distribution grid
- The transformer
- The domestic circuit

- Writing and speaking: describing a system (the grid, the domestic circuit) or a component (the transformer) by using a diagram.

- Reading: The battle of the currents : N.Tesla and T. Edison
